## **News Release**

**NANAIMO February 15, 2011:** In 2009, the Vancouver Island Regional Library Board of Trustees commissioned a Consolidated Facilities Master Plan (CFMP). In June 2010 the Board approved the consultant's suggested minimum target size of 2,750 sq ft based on sound architectural formulas.

Following a public process, by which an Expression of Interest was issued, staff was directed to negotiate for library space on Quadra Island.

Through the public process we are optimistic that we will find a suitable facility so we can continue to provide strong library services to residents of Quadra and neighbouring islands.
